- 7.4.1 Group frequency channels can be used only if the duty to maintain continuous two-way communication with the ATC units whenever required is simultaneously fulfilled.
- 7.4.2 Due to the possible interference of airspace users abroad, frequency channels not internationally coordinated by the Ministry of Transport may not be used for radio communication under any circumstances.
- 7.4.3 A group frequency channel for "aircraft-to-aircraft" radio communication can be used in the airspace of the Czech Republic only if the Czech Telecommunications Authority (ČTÚ) has issued a valid Individual authorization for the use of radio frequencies for the operation of the air station of the communicating aircraft or, in the case of foreign aircraft, an authorisation from the relevant foreign telecommunications authority.
- 7.4.4 Radio communication on group channels must have an operational overlap (e.g. transmission of information about meteorological conditions), must be concise and short, and gaps between individual transmissions (sessions) must be sufficient so that in urgent cases it is possible to enter the conversation by keying. For communication on assigned group frequency channels, the radiocommunication procedures set out in Regulation L Phraseology (Radiotelephone Procedures and Aeronautical Phraseology and Terminology for the Provision of Air Traffic Services and the Conduct of Flights) must be followed. The group frequency channel in use must not be overwhelmed by any radio communication not directly related to flight operations.
- 7.4.5 Group frequency channels allocated for aircraft-to-aircraft radio communication between gliders may only be used in the specified order of use. This means that the pilot first tunes the frequency channel with the serial number 1, if it is fully occupied, he tunes the following frequency channel according to the assigned order, up to the frequency channel with the sequence number 7. The order of the assigned frequency channels is binding and cannot be changed.
- 7.4.6 Frequency channels with sequence number 8 and 9 are primarily intended for other purposes. Group channel with sequence number 8 is a newly coordinated channel for "aircraft-aircraft" communication for use in European countries, therefore its tuning order is not limited by the conditions set out in clause 7.4.5. It can be expected that this frequency channel will be used by foreign pilots communicating in a foreign language. The frequency channel with sequence number 9 is primarily intended for long wave flying (wave flying over the mountains in the area between the Krkonoše and Jeseníky mountains) in the period from September to March, therefore it cannot be used for glider radio communication for other purposes during this period. Outside of the specified period of September to March, this group channel can be used for normal A-A glider radio communication.
- 7.4.7 Group frequency channels are not primarily intended for air sports competitions ("Competition") and aerial public performances. For the competition, its organizer is obliged to ensure the coordination of a sufficient number of separate frequency channels, which will be protected from interference from other traffic and at the same time will not cause interference to surrounding traffic. International coordination is carried out at the request of the organizer of the competition by the Department of Civil Aviation of the Ministry of Transport. The contact e-mail is frequency@mdcr.cz. The request for coordination of a frequency channel must be delivered at least 90 days before the start of its expected use, in order to prevent a lack of free frequency channels and ensure problem-free coordination. Subsequently, the applicant is issued with a Certificate of Frequency Coordination. In the event that several competitions are held on the same date, each competition organizer must request the coordination of separate frequency channels individually.

- 7.4.8 To ensure an adequate level of air traffic safety, it is based on the number of registered participants. For smaller regional competitions, the competition organizer is obliged to coordinate at least one separate channel for A-A radio communication for a maximum of 10 registered participants. For regional competitions of a larger scale (more than 35 participants) and nationwide competitions such as the championship of the Czech Republic, the competition organizer is obliged to coordinate at least one separate channel for A-A radio communication for a maximum of 8 registered participants + at least one back-up separate channel for A-G radio communication for the needs of the organizer of the competitions. For international competitions, the competition organizer is obliged to coordinate at least one separate channel for A-A radio communication for each team + at least two backup separate channels for A-G radio communication for the needs of the organizer of the competition.
- 7.4.9 In order to use the frequency channel for "aircraft-to-ground" radio communication (radio communication type A-G), it is always necessary to apply to the Czech Telecommunications Office for the issuance of an Individual authorization for the use of radio frequencies. Issuance of an Individual Authorization is subject to the submission of a Certificate of Frequency Coordination from the Ministry of Transport.
- 7.5 General
- 7.5.1 Uncontrolled low level traffic may register difficulties in establishing and maintaining radio communication with appropriate ATS units, caused by orographic specifics.
- 7.5.2 DOC (Designated Operation Coverage)
- 7.5.2.1 Every frequency can be used only within the Designated Operation Coverage (DOC). When a given frequency is used within the DOC, it should not be interfered and also the broadcast on a given frequency should not be the source of interference in other areas. Since the area where the CR is situated is intensely congested by frequencies, it is necessarily required to keep the defined DOC.
- 7.5.2.2 In the airspace and at the aerodromes where ATC is not provided the appropriate frequencies are used particularly within the ATZ (see paragraph 2.4.2 of part VFR-ENR-2). It is possible to use the appropriate frequency by default in a wider area, due to reasons stated in paragraph 7.1.1.1, but at the maximum of radius 10 NM from the ARP and vertically up to the height 4000 ft AMSL. In exceptional cases it is possible to use within the coordinated DOC a frequency in an area at the maximum of radius 16 NM from the ARP and up to height 3000 ft AMSL. If the airspace of class C or D or a prohibited area impinges into the DOC thus designated vertically and horizontally, the boundary of the DOC is formed by boundaries of such airspaces.
- Note: DOC is designated operation coverage defined for given service type in accordance with the aviation regulation L 10. Defined DOCs are stated in Doc. 7754 FASID (ICAO-EUR).*
- 7.5.2.3 The DOC for other particular ATS airspaces (FIR, CTA, TMA, CTR) and for group frequencies is defined in AIP of the CR.
- 7.6 All communication with the airports proceeds with 8,33 kHz channel spacing.
- 7.7 Explanations of frequency labels
- Unless otherwise stated, FREQ are in channel spacing 8,33 kHz.
- ¹ Channel spacing 25 kHz
 - ² Reserve

Controlled aerodromes and ATS are highlighted

7.8 Emergency FREQ 121,500 MHz is available at all ATS units.

1 LOCAL TRAFFIC REGULATIONS AND RESTRICTIONS

1.1 Aerodrome areas

1.1.1 The LKPN aerodrome is situated in MCTR Čáslav and in immediate vicinity of MCTR Pardubice.

1.1.2 The following TRA GA areas are established: TRACVPNC1 (Podhořany C1), TRACVPNC2 (Podhořany C2), TRACVPNC3 (Podhořany C3), TRACVPNC4 (Podhořany C4), TRACVPNC5 (Podhořany C5), TRAPDPNP1 (Podhořany P1), TRAPDPNP2 (Podhořany P2), TRAPDPNP3 (Podhořany P3), TRAPDPNP4 (Podhořany P4). Information on the activation and scope of use of TRA GA can be obtained by telephone or on the operational frequency of MAPP/MTWR Čáslav, MAPP/MTWR Pardubice or the Unit providing information to known traffic at Podhořany.

1.1.3 The given TRA GA is activated upon the operator's request to the appropriate ATC unit. Class G airspace rules apply within the TRA GA. The TRA GA areas are also a radio mandatory zone - RMZ, with the unit Providing information to known traffic Podhořany.

1.1.4 During the deactivation of the TRA GA areas, the same procedures as for VFR flights in MCTR Čáslav are applied for arrivals/departures, with a permanent two-way communication with MTWR Čáslav.

1.2 Arrivals and departures outside operational hours of AD LKPN are permitted only by prior agreement with AD LKPN operator.

1.2.1 Operations of other operators, except for individual arrivals and departures, e.g., repeated training flights, introductory flights, parachute jumps, test flights, slope soaring, and others, are possible at LKPN only with the prior written approval of the operator: Východočeský aeroklub Pardubice z.s., taking into account the technical and operational capacities of LKPN.

1.3 RWY 07/25 is preferred for take-offs and landings. Exceptions can only be permitted by AD operator.

1.4 The road in front of THR RWY 25 shall be overflown during take-off and landing at a minimum height 15 m from the lowest part of the aircraft or towed object.

1.5 RWY 31 only for landings, take-offs from RWY 31 prohibited except tow winch take-offs.

1.6 Traffic circuit altitude is 2300 ft/700 m AMSL.

1.7 Expect aircraft models traffic in the southern part of RWY 13/31.

1.8 Unserviceability of runways can be expected after rain.

1.9 Snow removal is not provided.

1.10 Taxiing only on runways or according to instructions of unit Providing information to known traffic.

2 ADDITIONAL INFORMATION

2.1 Providing information to known traffic is provided in Czech. Providing information in English can be arranged upon request at least 48 hours in advance.

Chapter end

Intentionally left blank

In strong SE winds, there is significant turbulence behind the Hostýn Mountains. The terrain of the Hostýn Hills rises to the east of the airfield. Overhead power line 600 m before the threshold of RWY 10. Do not fly over surrounding villages and the Chlum hill north of the UL airfield below 1000 ft / 300 m AGL. If model aircraft operators are present, inform them of your landing by flying a circuit.
