GEN-3 ABBREVIATIONS USED IN VFR MANUAL

3.1 Abbreviations

*Abbreviations marked by an asterisk *) are either different from or not contained in ICAO Doc 8400.*

A		
Oblastní středisko řízení nebo oblastní služba řízení	ACC	Area Control Centre or area control
Středisko poskytující ATS v řízené oblasti (CTA) Praha	ACC Praha	Centre providing ATS within Controlled Area (CTA) Praha
Letiště	AD	Aerodrome
Identifikační pásmo protivzdušné obrany (vyslovuje se "AY - DIZ")	ADIZ	Air defence identification zone (to be pronounced "AY - DIZ")
Letový plán podaný za letu	AFIL	Flight plan filed in the air
Letištní letová informační služba	AFIS	Aerodrome flight information service
Letecká pevná telekomunikační síť	AFTN	Aeronautical Fixed Telecommunication Network
Nad úrovní země	AGL	Above ground level
Letecký informační oběžník	AIC	Aeronautical information circular
Správa leteckých informací	AIM	Aeronautical information management
Letecká informační příručka	AIP	Aeronautical information publication
Regulovaný systém řízení leteckých informací	AIRAC	Aeronautical information regulation and control
Letecká informační služba	AIS	Aeronautical Information Service
Pohotovostní služba	ALRS	Alerting service
Nadmořská výška	ALT	Altitude
Pracoviště uspořádání vzdušného prostoru	AMC*	Airspace management cell
Oprava/změna AIP	AMDT	Amendment (AIP amendment)
Nad střední hladinou moře	AMSL	Above mean sea level
Odbavovací plocha	APN	Apron
Přibližovací stanoviště řízení nebo řízení přiblížení nebo přibližovací služba řízení	APP	Approach control office or approach control or approach control service
Ohlašovna letových provozních služeb	ARO	Air traffic services reporting office
Vztažný bod letiště	ARP	Aerodrome Reference Point
Skutečný čas přiletu	ATA	Actual time of arrival
Řízení letového provozu (všeobecně)	ATC	Air Traffic Control (in general)
Letové povolení ATC	ATC CLR	Air Traffic Control Clearance
Minimální nadmořská výška pro poskytování přehledových služeb ATC	ATCSMA*	ATC Surveillance Minimum Altitude
Skutečný čas odletu	ATD	Actual time of departure
Automatická informační služba koncové řízené oblasti	ATIS	Automatic Terminal Information Service

Letové provozní služby	ATS	Air Traffic Services
Letištní provozní zóna	ATZ	Aerodrome Traffic Zone
Plán využití vzdušného prostoru	AUP*	Airspace Use Plan
C		
Centrální ohlašovna letových provozních služeb	CARO*	Central air traffic services reporting office
Povolte nebo povoleno do ... nebo povolení	CLR	Clear(s) or cleared to ... or clearance
Řízená oblast	CTA	Control Area
Řízený okrsek	CTR	Control Zone
Č		
Česká republika	ČR	Czech Republic
D		
Nebezpečný prostor (následovano označením prostoru)	D...	Danger area (followed by identification)
Odletět nebo odlet	DEP	Depart or departure
E		
Předpokládaná doba letu	EET	Estimated elapsed time
Předpokládat nebo předpokládaný nebo předpoklad (jako označení druhu zprávy)	EST	Estimate or estimated or estimate (message type designator)
Předpokládaný čas příletu nebo předpokládaný přílet	ETA	Estimated time of arrival or estimating arrival
Předpokládaný čas odletu nebo předpokládaný odlet	ETD	Estimated time of departure or estimating departure
Předpokládaný čas přeletu význačného bodu	ETO	Estimated time over significant point
F		
Letové informační středisko	FIC	Flight Information Centre
Středisko poskytující letovou informační a pohotovostní službu neřízeným letům VFR ve FIR Praha	FIC Praha	The centre providing FIS and ALRS to uncontrolled VFR flights within FIR Praha
Letová informační oblast	FIR	Flight information region
Celý vzdušný prostor ČR od země po letovou hladinu FL660, zahrnující řízené i neřízené vzdušné prostory, včetně koncových řízených oblastí, řízených okrsků a letištních provozních zón (ATZ), vyjma R, D, P, TSA, TRA v době jejich aktivace.	FIR Praha	The entire Czech airspace from GND to FL660 comprehending controlled and uncontrolled areas including terminal areas, controlled zones and aerodrome traffic zones (ATZ), except R, D, P, TSA and TRA during their activation.
Letová informační služba	FIS	Flight information service
Podaný letový plán (označení druhu zprávy)	FPL	Filed flight plan (message type designator)
Kmitočet nebo kmitočtový kanál	FREQ*	Frequency or frequency channel

G

Oblastní předpověď pro lety v nízkých hladinách	GAMET	Area forecast for low-level flights
Země	GND	Ground

H

Nepřetržitá denní a noční služba	H24	Continuous day and night service
Od východu do západu slunce	HJ	Sunrise to sunset
Od západu do východu slunce	HN	Sunset to sunrise
Služba je k dispozici podle potřeb provozu	HO	Service available to meet operational requirements
Hodina, hodiny	HR	Hours
Služba je k dispozici v době pravidelných letů	HS	Service available during hours of scheduled operations
Doba činnosti není specifikována	HX	No specific working hours

I

Mezinárodní organizace pro civilní letectví	ICAO*	International Civil Aviation Organization
Pravidla pro let podle přístrojů	IFR	Instrument flight rules
Meteorologické podmínky pro let podle přístrojů	IMC	Instrument meteorological conditions
Informace	INFO	Information

L

Letecká amatérská asociace ČR	LAA ČR*	Light Aircraft Association of the CR
Systém pro rezervaci místní činnosti	LARS*	Local Activity Reservation System
Místní letová činnost	LFA (MLČ)*	Local flight activity
Letecká informační služba	LIS*	Aeronautical Information Service

M

Vojenská ohlašovna letových provozních služeb	MARO*	Military air traffic services reporting office
Vojenský řízený okresek	MCTR*	Military Controlled Zone
Pravidelná letištní meteorologická zpráva (v meteorologickém kódu)	METAR	Aerodrome routine meteorological report (in meteorological code)
Místní pravidelná meteorologická zpráva (ve zkrácené otevřené řeči)	METREPORT	Local routine meteorological report (in abbreviated plain language)
Místní letová činnost	MLČ (LFA)*	Local flight activity
Minimální sektorová nadmořská výška	MSA	Minimum sector altitude
Střední hladina moře	MSL	Mean sea level
Vojenská koncová řízená oblast	MTMA*	Military Terminal Control Area
Horská vlna	MTW	Mountain waves
Vojenská letištní řídicí věž	MTWR*	Military Aerodrome Control Tower

N

Integrovaný systém protivzdušné a protiraketové obrany NATO	NATINAMDS*	NATO Integrated Air and Missile Defence System
---	------------	--

Severoatlantická aliance	NATO*	North Atlantic Treaty Organization
Noc	NGT	Night
Oznámení rozšiřované telekomunikačními prostředky, obsahující informaci o zřízení, stavu nebo změně kteréhokoli leteckého zařízení, služby nebo postupů, nebo o nebezpečí, jejichž včasná znalost je nezbytná pro pracovníky, kteří se zabývají letovým provozem	NOTAM	A notice distributed by means of telecommunication containing information concerning the establishment, condition or change in any aeronautical facility, service procedure or hazard, the timely knowledge of which is essential to personnel concerning with flight operations
Národní posilový systém protivzdušné obraný ČR	NaPoSy PVO ČR*	National Reinforcing Air Defence System of the Czech Republic

O

Na vyžádání	O/R	On request
Otevírat nebo otevírající nebo otevřený	OPN	Open or opening or opened
Provozovatel nebo provozovat nebo činný, provozní nebo pracovat, býti činný nebo operační, provozní	OPR	Operator or operate or operative or operating or operational
Provoz, lety	OPS	Operations

P

Zakázaný prostor (následuje označení prostoru)	P...	Prohibited area (followed by identification)
Cestující	PAX	Passenger(s)
Padákový kluzák / závěsný kluzák	PG/HG (PK/ZK)*	Parachute glider / hang glider
Paragliding zone - prostor pro navijákové a odvíjákové starty padákových a závěsných kluzáků	PGZ *	Paragliding zone - area for tow winch of parachute and hang glider
Předletový informační bulletin	PIB	Pre-flight Information Bulletin
Provádění padákového výsadku	PJE	Parachute Jumping Exercise
Letový plán	PLN	Flight Plan

Q

Magnetický kurz (pro bezvětří)	QDM	Magnetic heading (zero wind)
Magnetický směrnik	QDR	Magnetic bearing
Nastavení tlakové stupnice výškoměru pro získání výšky nad mořem bodu, který je na zemi	QNH	Altimeter sub-scale setting to obtain elevation when on the ground

R

Omezený prostor (následuje označení prostoru)	R...	Restricted area (followed by identification)
Radiový informační maják	RADIM*	Radio Information Beacon
Záchrané koordinační středisko	RCC	Rescue Coordination Centre
Ztráta spojení (označení druhu zprávy)	RCF	Radiocommunication failure (message type designator)
Nové povolení za letu	RIF	Reclearance in flight

Poznámka	RMK	Remark
Oblast s povinným rádiovým spojením	RMZ*	Radio Mandatory Zone
Radiotelefon	RTF	Radiotelephone
Dráhová dohlednost	RVR	Runway visual range
Dráha	RWY	Runway

S

Sportovní létající zařízení	SLZ*	Sport Flying Equipment
NOTAM zvláštní série oznamující stanovenou formou nebezpečné podmínky na pohybové ploše, způsobené sněhem, ledem, rozředěným sněhem nebo stojící vodou původem ze sněhu, tajícího sněhu nebo ledu nebo jejich pominití	SNOWTAM	A special series NOTAM notifying the presence or removal of hazardous conditions due to snow, ice, slush or standing water associated with snow, slush and ice on the movement area, by means of a specific format
Východ slunce	SR	Sunrise
Západ slunce	SS	Sunset
Sekundární přehledový radar	SSR	Secondary Surveillance Radar

T

Převodní nadmořská výška	TA	Transition altitude
Občanský soumrak	TE*	End of civil twilight
Až do	TIL	Until
Koncová řízená oblast	TMA	Terminal Area
Oblast s povinným odpovídačem	TMZ*	Transponder Mandatory Zone
Dočasně rezervovaný prostor	TRA*	Temporary reserved area
Dočasně rezervovaný prostor určený pro provoz všeobecného letectví	TRA GA*	Temporary reserved area designated for operations of general aviation
Převodní hladina	TRL	Transition level
Dočasně vyhrazený prostor	TSA*	Temporary segregated area
Letištní řídicí věž nebo letištní řízení	TWR	Aerodrome control tower or aerodrome control
Pojezdová dráha	TWY	Taxiway

U

Mimo provoz	U/S	Unserviceable
Až do odvolání	UFN	Until further notice
Světový koordinovaný čas	UTC	Coordinated Universal Time
Aktualizovaný plán využití vzdušného prostoru	UUP*	Update use plan

V

Zaměřovací stanice pracující na VKV	VDF	Very high frequency direction-finding station
Pravidla pro let za viditelnosti	VFR	Visual flight rules
Dohlednost	VIS	Visibility
Meteorologické podmínky pro let za viditelnosti	VMC	Visual meteorological conditions

Meteorologické informace pro letadlo za letu	VOLMET	Meteorological information for aircraft in flight
---	--------	--

W

Ukazatel směru větru	WDI	Wind direction indicator
Nabývá účinnosti od nebo účinný od	WEF	With effect from or effective from
S okamžitou platností nebo okamžitě platný	WIE	With immediate effect or effective immediately
Provádí se práce	WIP	Work in progress

- 7.4.1 Group frequency channels can be used only if the duty to maintain continuous two-way communication with the ATC units whenever required is simultaneously fulfilled.
- 7.4.2 Due to the possible interference of airspace users abroad, frequency channels not internationally coordinated by the Ministry of Transport may not be used for radio communication under any circumstances.
- 7.4.3 A group frequency channel for "aircraft-to-aircraft" radio communication can be used in the airspace of the Czech Republic only if the Czech Telecommunications Authority (ČTÚ) has issued a valid Individual authorization for the use of radio frequencies for the operation of the air station of the communicating aircraft.
- 7.4.4 Radio communication on group channels must have an operational overlap (e.g. transmission of information about meteorological conditions), must be concise and short, and gaps between individual transmissions (sessions) must be sufficient so that in urgent cases it is possible to enter the conversation by keying. For communication on assigned group frequency channels, the radiocommunication procedures set out in Regulation L Phraseology (Radiotelephone Procedures and Aeronautical Phraseology and Terminology for the Provision of Air Traffic Services and the Conduct of Flights) must be followed. The group frequency channel in use must not be overwhelmed by any radio communication not directly related to flight operations.
- 7.4.5 Group frequency channels allocated for aircraft-to-aircraft radio communication between gliders may only be used in the specified order of use. This means that the pilot first tunes the frequency channel with the serial number 1, if it is fully occupied, he tunes the following frequency channel according to the assigned order, up to the frequency channel with the sequence number 7. The order of the assigned frequency channels is binding and cannot be changed.
- 7.4.6 Frequency channels with sequence number 8 and 9 are primarily intended for other purposes. Group channel with sequence number 8 is a newly coordinated channel for "aircraft-aircraft" communication for use in European countries, therefore its tuning order is not limited by the conditions set out in clause 7.4.5. It can be expected that this frequency channel will be used by foreign pilots communicating in a foreign language. The frequency channel with sequence number 9 is primarily intended for long wave flying (wave flying over the mountains in the area between the Krkonoše and Jeseníky mountains) in the period from September to March, therefore it cannot be used for glider radio communication for other purposes during this period. Outside of the specified period of September to March, this group channel can be used for normal A-A glider radio communication.
- 7.4.7 Group frequency channels are not primarily intended for air sports competitions ("Competition") and aerial public performances. For the competition, its organizer is obliged to ensure the coordination of a sufficient number of separate frequency channels, which will be protected from interference from other traffic and at the same time will not cause interference to surrounding traffic. International coordination is carried out at the request of the organizer of the competition by the Department of Civil Aviation of the Ministry of Transport. The contact e-mail is frequency@mdcr.cz. The request for coordination of a frequency channel must be delivered at least 90 days before the start of its expected use, in order to prevent a lack of free frequency channels and ensure problem-free coordination. Subsequently, the applicant is issued with a Certificate of Frequency Coordination. In the event that several competitions are held on the same date, each competition organizer must request the coordination of separate frequency channels individually.

- 7.4.8 To ensure an adequate level of air traffic safety, it is based on the number of registered participants. For smaller regional competitions, the competition organizer is obliged to coordinate at least one separate channel for A-A radio communication for a maximum of 10 registered participants. For regional competitions of a larger scale (more than 35 participants) and nationwide competitions such as the championship of the Czech Republic, the competition organizer is obliged to coordinate at least one separate channel for A-A radio communication for a maximum of 8 registered participants + at least one back-up separate channel for A-G radio communication for the needs of the organizer of the competitions. For international competitions, the competition organizer is obliged to coordinate at least one separate channel for A-A radio communication for each team + at least two backup separate channels for A-G radio communication for the needs of the organizer of the competition.
- 7.4.9 In order to use the frequency channel for "aircraft-to-ground" radio communication (radio communication type A-G), it is always necessary to apply to the Czech Telecommunications Office for the issuance of an Individual authorization for the use of radio frequencies. Issuance of an Individual Authorization is subject to the submission of a Certificate of Frequency Coordination from the Ministry of Transport.
- 7.5 General
- 7.5.1 Uncontrolled low level traffic may register difficulties in establishing and maintaining radio communication with appropriate ATS units, caused by orographic specifics.
- 7.5.2 DOC (Designated Operation Coverage)
- 7.5.2.1 Every frequency can be used only within the Designated Operation Coverage (DOC). When a given frequency is used within the DOC, it should not be interfered and also the broadcast on a given frequency should not be the source of interference in other areas. Since the area where the CR is situated is intensely congested by frequencies, it is necessarily required to keep the defined DOC.
- 7.5.2.2 In the airspace and at the aerodromes where ATC is not provided the appropriate frequencies are used particularly within the ATZ (see paragraph 2.4.2 of part VFR-ENR-2). It is possible to use the appropriate frequency by default in a wider area, due to reasons stated in paragraph 7.1.1.1, but at the maximum of radius 10 NM from the ARP and vertically up to the height 4000 ft AMSL. In exceptional cases it is possible to use within the coordinated DOC a frequency in an area at the maximum of radius 16 NM from the ARP and up to height 3000 ft AMSL. If the airspace of class C or D or a prohibited area impinges into the DOC thus designated vertically and horizontally, the boundary of the DOC is formed by boundaries of such airspaces.
- Note: DOC is designated operation coverage defined for given service type in accordance with the aviation regulation L 10. Defined DOCs are stated in Doc. 7754 FASID (ICAO-EUR).*
- 7.5.2.3 The DOC for other particular ATS airspaces (FIR, CTA, TMA, CTR) and for group frequencies is defined in AIP of the CR.
- 7.6 All communication with the airports proceeds with 8,33 kHz channel spacing.
- 7.7 Explanations of frequency labels
- Unless otherwise stated, FREQ are in channel spacing 8,33 kHz.
- ¹ Channel spacing 25 kHz
 - ² Reserve

Controlled aerodromes and ATS are highlighted

7.8 Emergency FREQ 121,500 MHz is available at all ATS units.

Chapter end

1 LOCAL TRAFFIC REGULATIONS AND RESTRICTIONS

- 1.1 Snow clearance is not provided in the winter season.
- 1.2 Traffic reduction can be expected after prolonged rains due to grassy RWY surface.
- 1.3 RWY 09L/R can be used for take-offs only with the approval of officer of unit Providing information to known traffic. After take-off from RWY 09L/R turn left heading 045° and after take-off from RWY 24L/R turn right heading 270° in order to avoid the villages.
- 1.4 In Aerodrome Traffic Zone (ATZ) avoid flying in a distance less than 300 m from villages or fly in MNM altitude 2 953 ft / 900 m AMSL.
- 1.5 Sporting flying equipment (ultralight ACFT) and free balloons operation is the subject of prior agreement with AD operator only.
- 1.6 The model aircraft operation is possible north of RWY 06/24.
- 1.7 The traffic circuits:
 - RWY 06, 09L/R - left hand
 - RWY 24, 27L/R - right handgliders
 - RWY 06, 09L/R - right
 - RWY 24, 27L/R - left
- 1.7.1 The traffic circuit altitude is 2460 ft / 750 m.
- 1.8 Noise abatement
 - 1.8.1 Local activity (repetitive traffic circuit flights, LKBE - LKBE aero tows) is subject to coordination agreement with the AD operator, otherwise a special landing charge is applied.
 - 1.8.2 Towing aircraft not complying with the noise limitation of AD operator can operate with AD operator agreement only.
- 1.9 Obstacles
 - A drinking water source protective zone and WDI 100 m northwest from TWR.
 - A road outside of aerodrome boundary with movement of persons and vehicles.
- 1.10 The aircraft operation without two-way radio communication is prohibited. Arrivals and departures without radio equipment are possible only by agreement with officer of unit Providing information to known traffic in accordance with the assigned procedures.
- 1.11 Banners are towed from the aerodrome. The place for hitch and dropping of banners is between the fuel station and RWY 09R/27L.
- 1.12 The road in both CWYs of the aerodrome shall be overflown during take-off and landing at least 15 m from the lowest part of the aircraft or towed object.
- 1.13 Local flight activity i.e. circuit flights and other activity in ATZ (apart from departures and arrivals) is allowed only:
 - from 6:30 (5:30) UTC until 20:00 (19:00) UTC on working days;

- from 8:00 (7:00) UTC until 19:00 (18:00) UTC on SAT, SUN, and HOL;
- if earlier, until SS.

2 ADDITIONAL INFORMATION

- 2.1 Providing information to known traffic in English language O/R 24 HR in advance.
- 2.2 Customs and immigration clearance
- a) request at AD operator shall contain the following information:
date of flight, estimated hour of arrival-departure, flight route (departure-destination), registration mark of aircraft and the number of crew and passengers.
 - b) commercial and uncommercial goods above value of 6000 CZK will not be admitted.
- 2.3 Rescue and firefighting services category 2 provided.
- 2.4 Information and regulations of AD operator are available on www.lkbe.eu.
- 2.5 VFR night traffic only on RWY 06/24 and TWY C with installed lighting. Night VFR flights are allowed only with prior letter of agreement.

3 CHARGES FOR AERODROMES

3.1 Landing charges

Per aeroplane up to 1500 kg MTOW	110,00
Per aeroplane over 1500 kg MTOW	200,00
Ultralight aircraft, powered gliders	70,00
Glider	50,00
Balloon (take-off likewise)	200,00
Special charge	500,00

Value added tax is included in rates.

3.2 Parking charges

up to 7 HR	60,00
ultralight aircraft up to 7 HR	35,00
from 7 HR up to 24 HR	120,00
every other day	60,00

Value added tax is included in rates.

3.3 Charges for passenger service

NIL

3.4 Other

The charge for dispatch of international flight is subject of a settlement with the aerodrome operator.

- 2.2.3 Arrivals and departures outside the published operating hours of the aerodrome are only possible O/R 24 HR in advance. See www.airport-cb.cz for the form.
- 2.3 Rescue and Fire Fighting Services
CAT 7.
- 2.4 Meteorological information provided:
METAR/SPECI AUTO

3 CHARGES FOR AERODROMES

All mentioned rates are in CZK without value added tax.

3.1 Landing charges

Each initiated tonne of MTOW	250,00
------------------------------	--------

3.2 Parking charges

Each initiated hour and tonne of MTOW	18,00
---------------------------------------	-------

First hour free of charge.

3.3 Charges for passenger service

AD used by passengers for departure 350 CZK per person.

3.4 Other

Besides of published charges an extra charge is accounted for covering of extra operational costs for each initiated hour of operation of the aerodrome outside published operational hours.

Extension of aerodrome operational hours - per each initiated hour: 21 000 CZK.

It is not applied to commercial air transport flights after agreement with the aerodrome operator.
